

Pruksa Silvana News

Dear valued customer,

Pruksa India would like to extend warm wishes to all of you in the month of Gowri Ganesh festival. The festivities bring in lot of happiness and togetherness amongst the family members and inspires the sense of well being and cultural values in the society and making better living more than possible.

Meanwhile, we would also like to share some more updates about our Pruksa Silvana Project. There has been a good progress in the field of Infrastructure Development of the project. New concrete roads, development of park areas, club house, swimming pool and waste management system including Organic Converter are some of the noticeable developmental works under progress. A total number of 207 units are under various stages of construction. Some clients have completed the registration, finished their interior works and have moved into their new homes. Pruksa India wishes the customers a new experience at Silvana.

On 14th September 2012, Pruksa India Housing in association with Government High School, Bidarahalli, Bangalore organised a painting competition for high school children in the age of 12 to 15 years. The theme of the Competition

was "How would you like to see Bengaluru in the near future". The event witnessed overwhelming response from 250 students and a student from 8th Standard Mr. Harish bagged the first prize, a bicycle for his exclusive painting. The event had team prizes for promoting team spirits among the different groups. Fostering creative excellence among Govt high school children and creating a platform to exhibit their natural talent was the core objective of this event. Pruksa India, in its own way, strongly believes in certain important values of contributing something to the society in which we live in along with the regular business ambitions.

"Our quest for dream home was realized at Pruksa Silvana. I still remember what we said when we stepped in this abode for very first time, "WOW" We admire not only Pruksa's transparency to the customer but also their commitment in making this place the same as it was promised to be. Innovative cost effective construction techniques (Mivan technology) was indeed one of the most important driving force for us. We are eagerly waiting to move-in as soon as possible."

Vikas & Anjali
